

## **RISK FREE IMPORT SERVICE**

Should the perfect vehicle not be found from our available stock at our showroom, our sales team will consult you in ordering the best vehicle which fulfils your criteria. Once the desired vehicle is chosen (by you or with the help of our sales team), a mechanic is sent to inspect and audit the vehicle for any faults, damages and rust. The accident history is also inspected. Should the vehicle fail to pass any of the aforementioned tests, our sales team shall inform you of this and the vehicle will not be purchased. An alternative vehicle will be found by our sales team and the above process is reperformed for the new vehicle.

Alternatively if the vehicle passes all of the tests performed and is approved by our mechanic, you shall be informed accordingly and the vehicle is purchased and secured. It is thereafter loaded on a transporter (hence, the vehicle is not driven).

Once the vehicle arrives in Malta you are able to schedule a test drive and get it checked by mechanics /panel beaters / sprayers of your choice. It is imperative to note that up until this point, *you are still not required to give any deposit and you are still under NO obligation to purchase the vehicle.*

Additionally, all our vehicles are **HPI and JEVIC** inspected and genuine mileage is also ensured. Moreover, a comprehensive warranty is granted on every imported vehicle.
